WORKSHOPS - AMERICANA FOYER

10:15 AM

SMARTGRAFT/REVIAN/JUVASONIC/SMART SOLUTIONS · WORKSHOP · AM FOYER

The Modern Hair Restoration Continuum: Diagnose. Restore. Regenerate.

Explore the evolving landscape of hair restoration through a comprehensive look at FUE, personalized diagnostics, regenerative approaches and needle-free serum delivery. This multi-industry educational program brings together SmartGraft, Smart Solutions RX, REVIAN and Juvasonic to examine how today's technologies and treatment options can come together across the hair restoration continuum.

Presented by: Adam Rubenstein, MD, FACS | Anna Petropoulos, MD, FRCS | Cynthia Rager | Sanjay Batra, PhD, FACC

Adam J. Rubinstein, MD, FACS - Vision Medical / SmartGraft

FUE Hair Restoration in Practice: Optimizing Graft Harvesting, Efficiency & Patient Outcomes

This physician-led presentation explores patient selection, graft harvesting, procedural efficiency and treatment planning. Drawing on real-world experience with the SmartGraft FUE system, Dr. Rubinstein will share practical considerations for incorporating hair restoration into an aesthetic or surgical practice.

Anna Petropoulos, MD, FRCS - REVIAN

Beyond the Procedure: Supporting Hair Restoration Results At-Home

Following the surgical perspective on FUE hair restoration, Dr. Petropoulos will explore the role of ongoing at-home care in supporting patients throughout their hair restoration journey. She will discuss the impact of hormonal changes, including perimenopause and menopause, on hair thinning and examine how photobiomodulation with the Revian Red Hair Growth System may be incorporated into a long-term approach following hair restoration procedures or as part of a non-surgical care plan.

Cynthia Rager - Smart Solutions RX

Beyond the Graft: Personalized & Regenerative Approaches to Hair Restoration

Explore how DNA-based diagnostics and emerging technologies, including exosomes, PDRN and growth factors, may contribute to individualized hair restoration strategies. This presentation examines how diagnostic tools and biologically derived products may complement traditional procedures and expand non-surgical treatment options.

Sanjay Batra, PhD, FACC - Juvasonic

Rethinking Delivery: The Science of Serum Absorption

This presentation introduces needle-free serum delivery technology and its potential applications in hair restoration. Attendees will explore delivery mechanisms, considerations for patient comfort and opportunities to incorporate alternative serum application methods into aesthetic practice workflows.

11:15 AM

JUVASONIC · LIVE DEMO WORKSHOP · AMERICANA FOYER

Live Hair & Scalp Treatment Experience: See it. Experience it. Bring it back to your practice.

Following the educational program, attendees are invited to experience hair and scalp technologies in action through live, interactive demonstrations. See Juvasonic treatments featuring Growth Factor Serum and HALO PDRN Serum, explore the HALO Smart Scope and discover how these technologies and protocols can be incorporated into the modern hair restoration practice.

PLANNED LIVE EXPERIENCES

- Live Juvasonic treatments using Growth Factor Serum
- Live Juvasonic treatments using HALO PDRN Serum
- HALO Smart Scope live demonstrations
- Live treatment stations
- Opportunities for attendees to interact directly with the technologies and team
