ASAM has been awarded the highest level of Accreditation with Commendation by the Accreditation Council for Continuing Medical Education (ACCME) as a provider of continuing medical education (CME) for physicians.

The ASAM 53rd in-person Annual Conference is coming soon! Water you wading for? Explore new topics and discover new ideas by joining over 2,500 colleagues in the Sunshine State. This is your chance to expand your practice with the latest science, research, and innovations in addiction medicine. This conference will be shore to provide more high-quality education, posters, awards, fun activities, and pre-conference offerings.

The ASAM 53rd Annual Conference begins on Thursday, March 31, 2022 at 5:30 pm with an opening welcome reception and concludes on Sunday, April 3, 2022 at 12:00 pm.

Three 8-hour pre-conference offerings are available on Thursday, March 31, 2022 from 8:00 am – 5:30 pm prior to the beginning of the Annual Conference for a separate registration fee.

Learning Objectives

At the end of the conference, participants should be able to:

- Identify and describe the new developments affecting the science, policy, and clinical practice of addiction medicine.
- Compare presented clinical guidelines/best practices with the participant's current practice and identify strengths or gaps.
- Analyze new research and science to develop practical applications for treatment or further research.
- Explain recent and upcoming policy changes and identify implications or areas for provider involvement.
- Create a network of professionals and a set of resources that can be used to support the participant's practice.

OPENING SCIENTIFIC PLENARY SESSION

Friday, April 1, 2022 | 8:30 am – 10:00 am

The ASAM 53rd Annual Conference will begin with the Opening Scientific Plenary Session. This session will be moderated by ASAM President William F. Haning, III, MD, bringing together renowned names in the addiction medicine field to motivate and energize conference attendees.

Chiquita Brooks-LaSure, MPP

Chinazo O. Cunningham, MD, MS, FASAM

Peter Bruun, Artist

Chiquita Brooks-LaSure, MPP – Administrator, *Centers for Medicare and Medicaid Services, US Department of Health and Human Services* – (Invited)

Chinazo O. Cunningham, MD, MS, FASAM – Commissioner, NY State Office of Addiction Services and Supports

R. Brinkley Smithers Distinguished Scientist Award Recipient

Dr. Chinazo Cunningham is Commissioner of the NY State Office of Addiction Services and Supports. In this role, she oversees substance use prevention, care, treatment, and policies across NY state. She is a physician trained in internal medicine and addiction medicine and has spent over 20 years providing care, developing programs, and conducting research with people who use drugs. For decades, she has collaborated with community-based harm reduction organizations. Her work has focused on improving access to care, utilization of health care services, and health outcomes. Dr. Cunningham has authored scores of peer-reviewed manuscripts, been the principal investigator on numerous federally funded grants, served on many scientific advisory committees, and received several mentoring awards.

Peter Bruun –Artist, Educator, Curator, *Bruun Studios*

Peter Bruun is an artist, educator, curator, and community activist in the arts. Bruun received a BA in Art History from Williams College in 1985 and went on to receive an MFA in 1989 from the Maryland Institute College of Art's (MICA). He remained in Maryland until 2019, where he pursued curatorial and community activism with initiatives such as the *New Day Campaign* and *Art on Purpose*, and continued his studio practice with such projects as *Autumn Leaves* and *Beyond Beautiful: One Thousand Love Letters*. In 2019, he moved to Maine, where he continues to work as an artist.

POLICY & SCIENCE PLENARY SESSION

Saturday, April 2, 2022 | 8:30 am – 10:00 am

Expanding Access to Care through Telehealth: Lessons Learned During the Pandemic

While there has long been interest in expanding access to addiction treatment through telehealth, there have historically been both regulatory and financial barriers that limited adoption. Through the COVID-19 public health emergency, federal and state regulations governing telehealth have been relaxed and payment mechanisms have expanded, leading to broad adoption with diverse models of implementation. This plenary session, moderated by ASAM's President-Elect, Brian Hurley, MD, will discuss the state of the research on telehealth for addiction treatment, innovative telehealth models, lessons learned during the pandemic, and implications for policies and practices going forward.

Distinguished Award Recipients:

ASAM Public Policy Award
US Senator Tammy Baldwin (D-WI)

ASAM Public Policy Award
US Senator Mike Braun (R-IN)

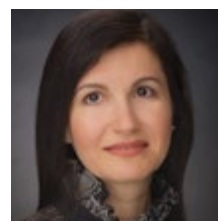

Distinguished Panel Presenters:

Pre-Conference Workshop

OVERVIEW

The ASAM Fundamentals of Addiction Medicine is an innovative, case-based course designed for providers who are new to seeing patients at risk or treating patients with addiction. Participants will be presented an overview of the basics of addiction medicine, which covers how to screen, diagnose, treat, and/or refer patients with addiction, many of whom have co-occurring medical and psychiatric comorbidities.

WHO SHOULD ATTEND

This workshop is for physicians, physician assistants, nurse practitioners, nurses, and behavioral health specialists. It is designed for those new to treating patients with addiction and for individuals who have had little or no addiction training in medical school.

LEARNING OBJECTIVES

Upon completion of this educational activity, participants should be able to:

1. Identify one's own feelings and attitudes that promote or prevent therapeutic responses to patients with addiction.
2. Demonstrate a knowledge of neurobiological changes that occur during substance use disorders
3. Explore validated patient screening tools and ambulatory assessment to detect substance use, interpret a spectrum of results, and match the patient to an appropriate level of care.
4. Utilize motivational interviewing to enhance patients readiness to change risky behaviors.
5. Offer the interventions that are appropriate to specific substances and severity of usage pattern.
6. Examine medications for treatment of alcohol, tobacco, and opioid use disorders. .
7. Offer patients and families' information and referral to behavioral interventions including support groups and mutual aid groups that assist in the recovery process.

COURSE TOPICS

- An Introduction to Addictive Disorder
- The Clinical Manifestations of the Neurobiology of Addiction
- A Brief Overview of Motivational Interviewing Basics
- Screening, Brief Intervention, and Referral to Treatment (SBIRT)
- Identifying Unhealthy Substance Use: Assessment
- Treating Substance Use Disorders with Medication and Counseling

ASAM MOTIVATIONAL INTERVIEWING Workshop

Thursday, March 31, 2022
8:00 am - 5:30 pm
(Separate Registration Required)

Pre-Conference Workshop

OVERVIEW

The ASAM Motivational Interviewing Workshop is an interactive and engaging workshop designed to introduce and expand participants' knowledge on utilizing Motivational Interviewing (MI) in an addiction treatment setting. MI is a goal-oriented, collaborative counseling style that evokes a person's own motivations and commitment to change.

Physicians, clinicians, counselors, and those working with patients with addiction often find that one of the main barriers to effective treatment is the patients' perceived lack of motivation to make changes. Without motivation on the patient's part, making and sustaining progress with treatment goals can be difficult. MI is one technique that clinicians can utilize to help patients make positive changes. Participants of this workshop will be introduced or reintroduced to the key concepts and skills of MI and explore ways to effectively integrate MI into addiction treatment to help promote positive patient outcomes.

WHO SHOULD ATTEND

Clinicians working with patients with addiction who are interested in an introductory workshop, which reviews the core skills of Motivational Interviewing (MI). This workshop is designed for those with little or no prior experience with MI.

LEARNING OBJECTIVES

Upon completion, participants should be able to:

1. Apply the spirit of MI to clinical practice
2. Compare and contrast MI congruent interactions with MI dissonant interactions.
3. Recognize change talk and apply the basic MI skills of open-ended questions, affirmations, reflective listening, and to summarize by selectively reinforcing change talk.
4. Identify further training opportunities for practicing the skills of MI.

COURSE TOPICS

- Welcome and Workshop Introduction
- Capturing the Spirit: An Introduction to MI
- Building the Foundation: The Four Processes
- It's all about Change Talk
- Applying Skills: Using OARS, Informing and Advising
- It's Your Journey: Learning MI and Creating a Practice Implementation Plan

ASAM PAIN & ADDICTION

Common Threads XXIII

Thursday, March 31, 2022
8:00 am - 5:30 pm
(Separate Registration Required)

Pre-Conference Course

OVERVIEW

The ASAM Pain & Addiction: Common Threads Course is one of ASAM's longest running and most popular courses. This advanced course is designed to increase learner's understanding of complex topics and improve treatment of patients who fall somewhere in the gray area around pain and addiction. Participants will learn new research developments that affect treatment, and how to integrate these techniques into their own practices. This year's course will utilize a dynamic mix of teaching methods to engage an advanced audience. This year's theme is "Interdisciplinary care for patients with pain and addiction in the virtual age".

WHO SHOULD ATTEND

This course is intended for those in the addiction medicine field who already have experience with pain and addiction but want to stay abreast of new research and practices. Other healthcare providers and members of the care team interested and experienced in treating this patient population are also encouraged to attend.

LEARNING OBJECTIVES

Upon completion of this educational activity, participants should be able to:

1. Describe new challenges in pain and addiction that have arisen from the COVID-19 pandemic.
2. Identify strategies to build resilience among health care teams and patients.
3. Differentiate between various interdisciplinary care models for treating patients with pain and addiction and explain the purpose of utilizing an interdisciplinary care team.
4. Discuss the pharmacology and toxicology of kratom, promising treatment approaches, and current gaps in the research on kratom.
5. Compare different treatment options for patients who cannot tolerate buprenorphine.
6. Implement practical strategies and principles of a successful virtual pain and addiction assessment.
7. Question the disparities in access to telemedicine that exists within the US and recognize the current and future telemedicine policies that affect patients' access to treatment.
8. Recognize the complex relationship between stimulants and pain.
9. Assess the current fentanyl epidemic and discuss promising treatment and harm-reduction practices.
10. Compare key pain and addiction research publications from 2021-2022 and identify their relevance to practice.

COURSE TOPICS

- New challenges that have arisen from the COVID-19 pandemic
- Building resilience among health care teams and patients
- Interdisciplinary treatment for pain and addiction
- Current research on kratom and stimulants
- Approaches for treating patients who cannot tolerate buprenorphine
- Conducting virtual pain and addiction assessments
- The "digital divide" and addressing virtual treatment access barriers
- The fentanyl epidemic and promising treatment and harm reduction practices
- Key pain and addiction research publications from 2021-2022
