

April 3 & 4, 2020

Live Stream Schedule

A new virtual experience which provides high-quality education, innovative topics, sessions, posters and supplemental virtual courses in a completely online platform.

KEY HIGHLIGHTS

- Approximately 60-75 hours of CME/CE/MOC
- Two days of live-streaming content from respected thought leaders
- Multiple offerings of live webinars on diverse topics
- Pre-recorded sessions on best practices and new developments
- An online poster gallery of over 100 scientific posters

LEARNING OBJECTIVES

At the end of the live event, participants should be able to:

- Identify and describe the new developments affecting the science, policy, and clinical practice of addiction medicine.
- Compare presented clinical guidelines/best practices with the participant's current practice and identify strengths or gaps.
- Analyze new research and science to develop practical applications for treatment or further research.
- Explain recent or upcoming policy changes and identify implications or areas for provider involvement.
