Penumbra 

CAVT™ · The Most Advanced Treatment for PE

STORM-PE RCT

Proven by Level 1 Evidence^{a,1}

CAVT shows superior efficacy
over anticoagulation alone^a

CAVT Arm

AC Arm

a. STORM-PE demonstrated superiority to anticoagulation utilizing Lightning Flash 1.0 and 2.0. Efficacy was predefined as the difference between treatment arms in change of RV/LV ratio from baseline to 48 hrs.

Penumbra 

Peripheral Vascular

Purpose-built technology.
Patient-centered solutions.

PEERLESS

RCT of FlowTrievers System vs. catheter-directed
thrombolytics in pulmonary embolism

With superior outcomes, only **FlowTrievers**[®]
moves PE patients forward faster.¹

3X fewer deteriorations or therapy escalations

Better, faster recovery of symptoms and hemodynamics

Less ICU utilization, hospital LOS^{*} and readmission burden

^{*}LOS = length of stay

References

Indications for Use

The FlowTrievers retrieval/aspiration system is indicated for (1) the non-surgical removal of emboli and thrombi from blood vessels and (2) injection, infusion, and/or aspiration of contrast media and other fluids into or from a blood vessel. The FlowTrievers retrieval/aspiration system is intended for use in the peripheral vasculature and for the treatment of pulmonary embolism. Trievers catheters are intended for use in treating clot in transit in the right atrium but not in conjunction with FlowTrievers catheters. Review complete Instructions for Use, Indications for Use, Warnings, Precautions, Possible Adverse Effects and contraindications prior to use of the product. For all non-Stryker products, please refer to manufacturer Instructions for Use/Intended Purpose for complete indications for use, contraindications, warnings and precautions. **Caution:** Federal (USA) law restricts this device to sale by or on the order of a physician.

Peripheral Vascular

This document is intended solely for the use of healthcare professionals. A healthcare professional must always rely on his or her own professional clinical judgment when deciding whether to use a particular product when treating a particular patient. Stryker does not dispense medical advice and recommend that surgeons be trained in the use of any particular product before using it in surgery.

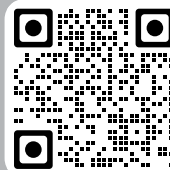

The information presented is intended to demonstrate Stryker's products. A healthcare professional must always refer to the package insert, product label and/or instructions for use, including the instructions for cleaning and sterilization (if applicable), before using any of Stryker's products. Products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact your representative if you have questions about the availability of Stryker's products in your area.

Stryker or its affiliated entities own, use, or have applied for the following trademarks or service marks: FlowTrievers and Stryker.

All other trademarks are trademarks of their respective owners or holders.

The absence of a product, feature, service name or logo from this list does not constitute a waiver of Stryker's trademark or other intellectual property rights concerning that name or logo.
