RAPID RHINO® Products vs Merocel®

There has been found to be a significant statistical difference between the Merocel pack and the RAPID RHINO packs in patients’ comfort on insertion and removal. These findings may influence the choice of nasal tampon used in the treatment of epistaxis in the future.¹

Figure 1. Visual analogue score of pain assessment during insertion of packs, where 0 = no pain and 10 = most severe pain imaginable

Figure 2. Visual analogue score of pain assessment while packs in place, where 0 = no pain and 10 = most severe pain imaginable

Figure 3. Visual analogue score of pain assessment on removal of packs, where 0 = no pain and 10 = most severe pain imaginable
